The Smaller Creature with the Larger Brain

One day a rabbit went out of its burrow to take a walk. When he was only a few steps away from his burrow, he heard a wolf call, "I am going to eat you!"

The rabbit was very frightened, but he had enough presence of mind to say, "Oh, no, Brother Wolf, you will not be able to do that! Only the hunter who is about to kill you will be able to eat me." Fearing hunters greatly, the wolf looked behind him to see if there was really a hunter there. As the wolf did this, the rabbit dashed quickly back into his burrow.

Let this be a lesson to you. Don't look down on little things. They may have bigger brains than you do.
